

I understand that expanding the LPFM system could possibly interrupt or replace my local K-Love station. I really don't want this to happen. K-Love serves me and my local community by providing positive, uplifting, encouraging music and messages that not only remind me of the wonderful gift I have in God's grace, but it also can reach many others in positive life-changing ways. For some in our community, it is the only Christian radio station, and if it were to be displaced, we could lose a fabulous resource of whole-some programming that seeks to only encourage and help people. Displacing it could prevent many people from hearing the good news about Jesus Christ and how asking him into their lives could change their destiny for all eternity. The programming has prevented many a person from committing suicide. I believe the service of K-Love is in the public interest because it provides an uplifting alternative to secular and commercial radio. There are already enough stations for popular music, rap, country, talk and the like, but there are so few that share Christian music and ideals that it would be a real shame to possibly displace the one and only Christian radio station in some areas. Besides, there are a lot of us out there that financially support their local K-Love station. Please don't take this away from those who truly love it, and from those whose lives could be changed by stumbling upon it on the radio dial. Thank you.
